

Request that an LPFM station not be allowed precedence over the FM translator that brings K-LOVE to my community. I ride in a 13-pax van and listen to this station on my (one hour) commute to/from Elmendorf AFB. By its nature of being commercial free and non-offensive, I can play this station at my work place. This national radio service is commercial free, contains no offensive conversations or gutteral language. I would argue that public input be accepted before an LPFM is granted precedence over a pre-existing service. I believe the family friendly format of K-LOVE provides a cohesive service not readily available on the airwaves. Please feel free to contact me at the e-mail above or via regular mail. Thank you for this opportunity to comment.
